

Project Name:

Type:

Catalog#:

The EX-LITE Troffer retrofit kit is an LED upgrade lighting kit by using existing fluorescent fixtures' chassis to minimize labor and disposal cost.

3 CCTs and 3 Wattages tunable.

Features & Specs

Construction:

- Beautiful white matte finish constructed with a high gauge durable body construction to withstand industrial and commercial warehousing environments.
- Frosted polycarbonate lens to provide even light distribution with no diode visibility or glare.

Mounting:

- Door hinged retrofit into existing troffer.

Electrical:

- High Power Factor, low THD UL listed driver.
- Universal line voltage input 110-277V.
- Dimmable 0-10V.
- Wattage tunable.

Optical:

- Frosted Polycarbonate lens.
- Easy-to-remove lens for easy maintenance.
- CCT tunable.

Controls Options:

- Emergency Backup.

Warranty:

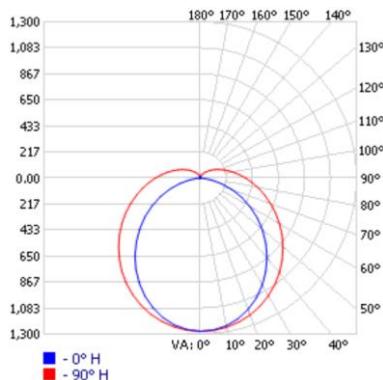

- 5 years warranty for complete kit.

Locking Latch

Prior to installation, disconnect all incoming power to fixture. Remove existing hardware (lens/lens frame, parabolic louver, reflectors/ballast covers, brackets, lamps/lamp holders). Leave supply and grounding leads. (Fig.1)

NOTE: Follow all federal and local regulations when disposing of lamps and removed components.

Locking Latch

Install LED panel end brackets to each end of the existing fixture by gently lifting it and placing LED panel end brackets between the fixture and T-grid. (Fig.2)

If you are not pleased with the gap between the fixture and T-grid, you may install LED panel side brackets between the fixture and T-grid, there are two tabs to allow for placing the side brackets into the slot of end brackets. (Fig.3)

Secure the LED panel brackets to the existing fixture using the provided #8x1/2" self-drilling screws. (Fig.2A)

Locate the door assembly body onto the keyholes of end brackets, and then slide the door assembly body horizontally to the end of slots. (Fig.4)

Hook the safety cables into the holes positioned the end brackets.

Use the wire caps to connect the wire leads of the troffer kits to the main power leads.

(Black-Live, White-Neutral, Green-Grounding) (Fig.5 & Fig.5A)

Secure the door assembly body by lock the latches riveted on each end of the assembled door frame. (Fig.6)
